

This comment is in response to the FCC new broadcast service LPFM and how this affects my favorite radio station K-LOVE. I started listening to K-LOVE earlier this year and will NEVER go back to the other trash that is on the radio. The music they play is so uplifting and positive. It instills happiness and hope in people, which is sadly lacking in this day and age. Why is it that whenever "good" stuff wants to be displayed, heard, etc. it always gets "yanked" for something trashy, unpleasing, disturbing, etc. I have been a financial backer of K-LOVE since the day I started listening and will continue to do so. I work from home and even listen to it over the internet on my computer. I have family that listen to K-LOVE in Oregon, South Dakota, Minnesota and Washington State. This radio station affects millions of lives every day in the most positive way possible. Don't take that away from us. Please!
